

Make Better With One

THE WORLD'S **BEST LASER TECHNOLOGY,** SHARED WITH EVERY MAKER.

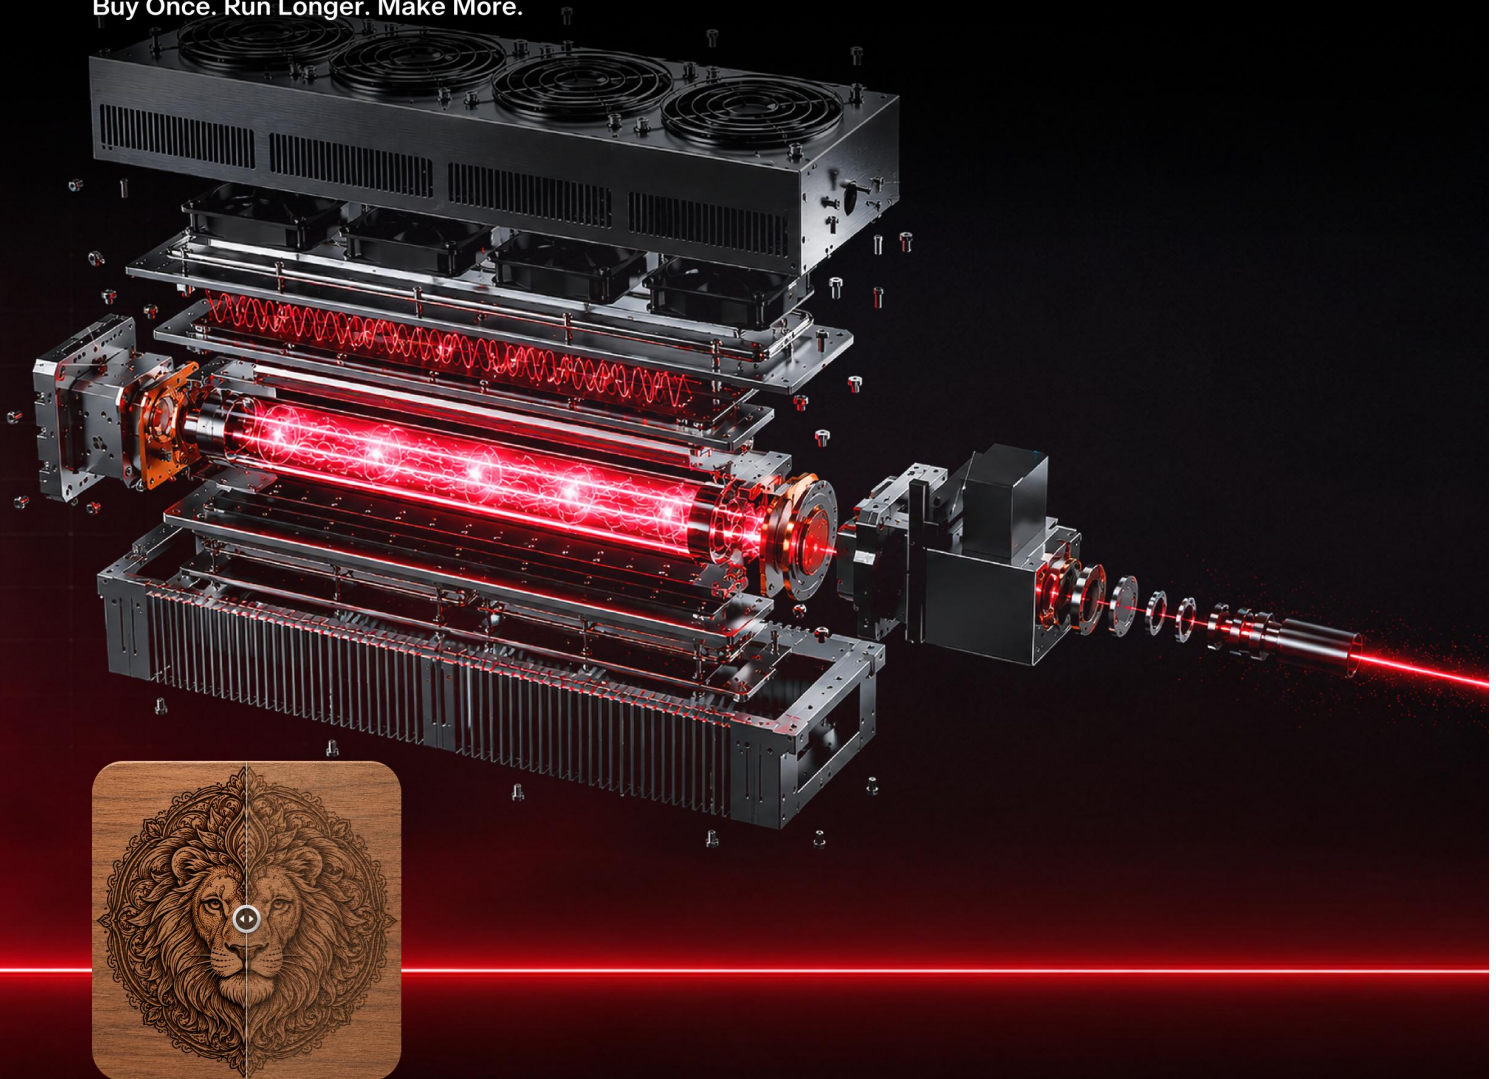

Trusted by **10,000+** Makers Across World.

www.1laser.com

ONELASER MEANS HIGH PERFORMANCE, REINVENTED.

Buy Once. Run Longer. Make More.

Long-Life RF Precision

Sealed Metal RF Tube, Stable Beam & 20,000–50,000-Hour Lifespan
Sharper Details, Less Downtime, Better Long-Term ROI

Print & Cut with Full Vision Intelligence

Camera-Guided Alignment, Auto Edge & Mark Detection
Every Cut Lands Exactly Where It Should

Engineered & Supported in the USA

US-Based Engineering, Service & Parts
Real Answers from Real Technicians, Fast

The RF Laser Leader

Industrial #1 RF Brand for Desktop
Industrial First Auto-Switch RF Hybrid System

Unmatched Speed

Up to 2,000 mm/s with True 4G Acceleration
Finish 3x More Orders Per Day

Rock-Solid Build

Aircraft-Grade Aluminum Frame, Reinforced Industrial Construction
Built for Long-Term Rigidity, Precision & Stability

YOUR **WORK** IS ONLY AS **GOOD** AS YOUR LASER.

That's why the best work runs on OneLaser.

Choose by What You Make

Start with the products, materials and production workflow you need. From high-speed metal marking to purpose-built drinkware engraving, each OneLaser platform is designed for a different business opportunity.

Galvo Laser

P16-P17

GALVO FLEX Series

First Choice in Galvo. Anywhere You Go.

VIPER Series

One Machine. Two Lasers. More Ways to Sell.

Tumbler Laser

P10-P11

VertiGo Series

World's First Rotary Laser for Drinkware.

Built-In Rotary
Vertical Workflow
Purpose-Built for Drinkware

Quick Selection Guide

DESKTOP

Gifts, décor, acrylic products and small-business production.

INDUSTRIAL

Signs, panels and batch production.

GALVO

Metal products, tools, jewelry and high-speed marking.

TUMBLER

Drinkware, bottles and rotary products.

Start compact. Scale production.
Expand into higher-margin customization.

1|ONELASER

X Series

The Leading Edge of Desktop RF.

Exceptional efficiency and category-leading capability — all in a desktop size, built for profitable businesses and passionate makers alike.

A man with a beard, wearing a black cap with "BUILT NOT BOUGHT" and a black apron, stands in a workshop. He is leaning on a white and black OneLaser X Series machine. The machine has "1|ONELASER" and "Gen2" branding. In the foreground, there are several items: a black tumbler with "BUILT NOT BOUGHT", a wooden plaque with "WORK HARD DREAM BIG", a brown leather wallet with "M MILLER", and a clear acrylic award with "Top Seller 2024". Above the machine, there are six icons with text: Fox News Channel, CES, #1 ranked, Best-Selling, 3-Year Warranty, and AI software.

Gen2

BUILT NOT BOUGHT

WORK HARD DREAM BIG

MILLER

Top Seller 2024

Why X Series Works Smarter

Professional RF engraving quality, faster setup, and safer desktop production — designed for makers who turn custom ideas into paid products.

Core Advantages

4K RF Precision

38W / 70W RF tube — air-cooled, long-lasting, photo-quality engraving.

Pinnacle Performance

1,200 mm/s real-world speed at 3.5G acceleration.

IVS (Intelligent Vision System)

High Resolution camera auto-detects Mark points enable print and cut.

FumeWatch Built In

Real-time gas monitoring in a fully enclosed design. Engrave clean, breathe easy.

Endless Engraving, Auto-Fed

Motorized feed + pass-through — oversized jobs, done automatically.

No Alignment Needed

Stable beam path, ready out of the box.

Raised Base, Bigger Reach

Motorized Z handles objects up to 6.5" tall.

Everything at Your Fingertips

Full touchscreen — control, alerts, diagnostics.

Tool-Free Magnetic Optics

Focus lens pops out for cleaning — no tools.

Smart Dual-Mode Air Assist (optional)

Auto-switches cutting and engraving airflow.

Powered by MakerBoost AI

One-click designs and material settings. Zero learning curve.

Instant Fire Protection

Auto-triggered suppression at the first sign of fire (>170°C).

Reengineered Motion System

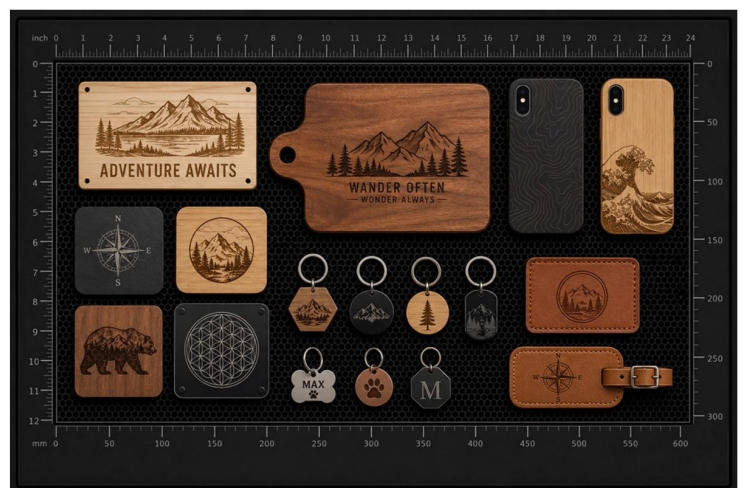

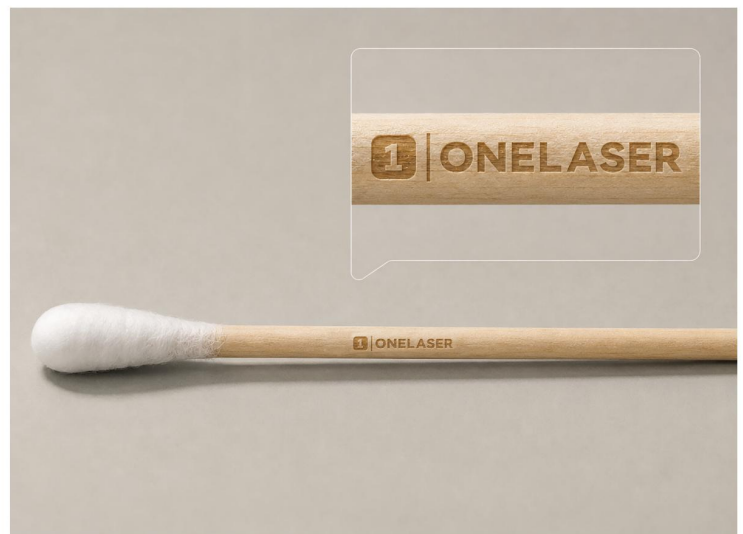

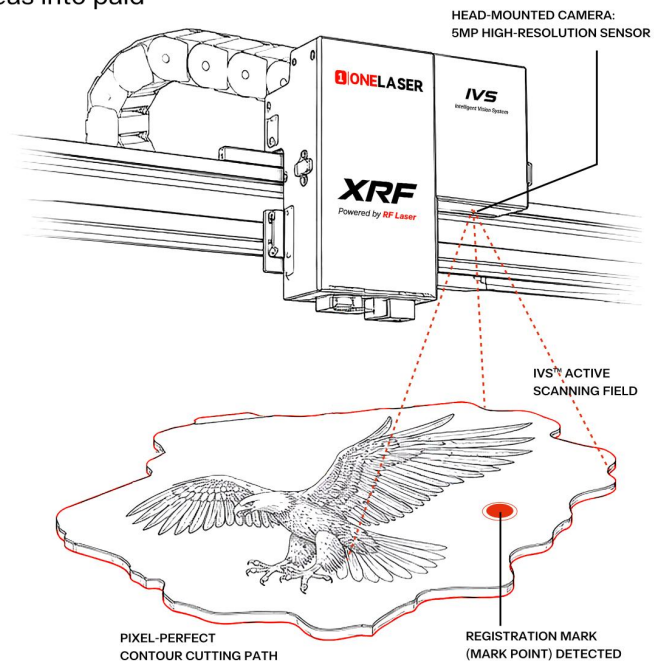

Low-friction axis for higher precision, longer life, stable speed.

Sealed Tight, Dust Out

Compact, sealed build blocks dust and soot.

Built Like a Tank for Performance

Rigorously tested — solid, reliable, built to last.

1|ONELASER

Y Series

Your First Desktop Laser. Made Easy.

Real laser capability at a price that makes sense — easy to own, easy to use, and ready to create for hobbyists stepping into laser engraving and cutting.

Smart Air Assist — automatic airflow for cleaner cuts and sharper engraving

Real-world performance: 1,000 mm/s engraving speed @ 2G acceleration

Motorized Z-axis with precision DSP motion control

IR, Glass CO₂, and RF tube — for all-material versatility

Powered by OneLaser's own AI software

CUT

Create clean shapes for signs, ornaments and everyday products.

ENGRAVE

Add names, logos and details that make every item personal.

START SELLING

Turn simple ideas into products for Etsy, pop-ups and small business orders.

Why Y Series Makes Sense

A practical way to start cutting, engraving and selling with confidence.

Power Options

75W CO2 Glass Tube

For strong, budget-friendly cutting.

38W CO2 RF Tube

For fine detail and long tube life.

Optional 3W/5W IR Module

For metal and multi-material marking.

Work Area & Smart Features

24 x 12 in Work Bed

A practical work area for everyday production.

Automatic Focus with IR Positioning

Faster setup and more accurate placement.

OneLaser AI Software

Controlled by OneLaser's own intelligent software.

Speed

Up to **1,200 mm/s** engraving speed at 2G acceleration

Build & Motion

Aerospace-Grade Aluminum

Built on OneLaser's proven engineering.

Motorized Z-axis

180 mm clearance for tall objects.

Front & Rear Pass-Through

Process oversized materials with ease.

Ultra-Light Laser Head

Fast, stable motion for precise engraving.

Full Chamber Fire Sensor

Enhanced safety for daily operation.

POPULAR MATERIALS

Perfect for everyday maker products, gift items, signage and personalized small-batch orders.

Wood

Acrylic

Leather

Cardboard

Glass

Coated & Anodized Metals

OPTIONAL

3W/5W

Infrared Laser Module

Precision marking for aluminum, brass, copper and coated metals.

Aluminum

Copper

Brass

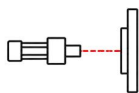

Coated Metals

VertiGo Series

World's First Rotary Laser for Drinkware

A space-saving vertical design that turns tumblers and bottles into finished products in minutes — engineered for retail spaces and high-volume, high ROI personalization.

Vertical Architecture

Purpose-built for cylindrical engraving.

38W RF Precision

Fine detail with stable, long-lasting output.

Compact Footprint

Professional production in just 630 × 550 mm.

Built Around Cylindrical Production

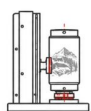

Load the product, focus automatically and start engraving.

Vertical Engraving

Traditional Horizontal Setup

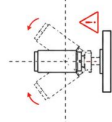

Upright, secure positioning

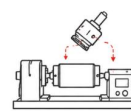

Integrated rotary workflow

Compact and production-ready

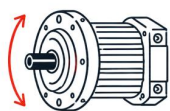

More alignment steps

Separate rotary setup

Larger workspace required

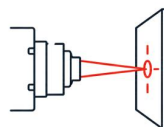

Integrated Rotary System

Faster setup with built-in rotary positioning.

Up to 800 mm/s

Fast engraving with 3G acceleration.

Auto Focus

Repeatable setup across different diameters.

Compact, Integrated Design

Built for studios, shops and live customization.

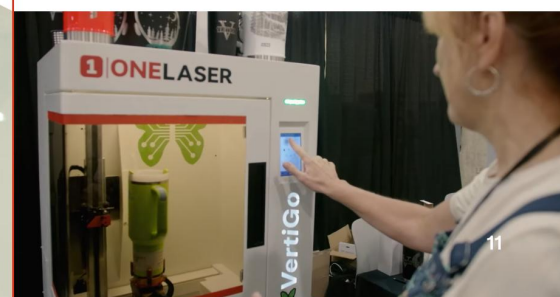

38W RF · Up to 800 mm/s · 3G · 2,000 DPI · ≤ 0.01 mm Accuracy · Auto Focus

Diameter Range: 89–230 mm Auto Focus · 16–230 mm Manual Focus

Tumblers · Bottles · Mugs · Trophies · Rotary Gifts

COBRA Series

Peak Glass Laser Within Reach.

Cobra is a powerful, accessible glass CO2 laser built to launch your business without overinvesting. Reliable and easy to use, it helps you create, sell, and grow from day one.

Acrylic Signage

Clean, professional signs and displays.

Wood Panels

Furniture parts, decorative panels and branded products.

Wall Décor

Large personalized artwork and layered designs.

Large-Format Branding

Retail displays, logos and commercial installations.

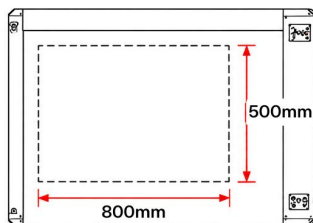

Cut Bigger · Produce Faster · Take Larger Orders

Choose the Size That Fits Your Growth

Three working areas, one production-focused platform.

Cobra 8

800 × 500 mm | 90W
Compact Production

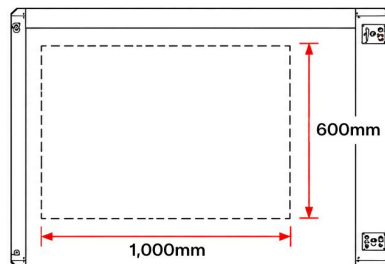

- Small Workshops
- Start-Up Businesses
- Cost-Efficient

RECOMMENDED

Cobra 10

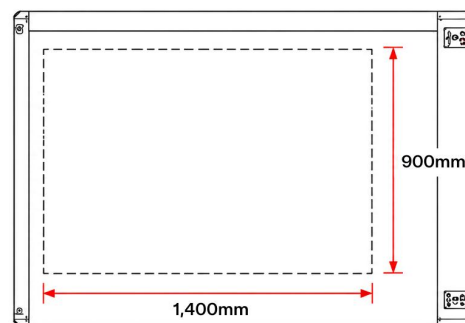

1,000 × 600 mm | 100W
Best All-Round Choice

- Growing Businesses
- High Mix Production
- Best Balance of Size & Power

Cobra 14

1,400 × 900 mm | 130W
Large-Format Production

- Large Workpieces
- Sign & Display Production
- High-Volume Output

Up to 1,200 mm/s

Fast engraving with 2G acceleration.

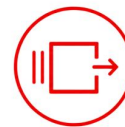

Autofocus + Red Dot

Faster setup and more accurate material positioning.

Smart Dual Air Assist

Automatically adjusts airflow for cutting and engraving.

Pass-Through Production

Process longer panels and oversized materials with fewer limits.

Up to 1,000 DPI

±0.02 mm Accuracy

Wi-Fi

LightBurn

Material Collection Tray

OPTIONAL

3W/5W

Infrared Laser Module

Precision marking for aluminum, brass, copper and coated metals.

1|ONELASER

HYDRA Series

The End Game of Performance Laser.

RF engraving quality, real production speed and scalable working sizes — built to complete more jobs, create higher-value products and grow with your business.

Sharper Detail · Faster Output · More Profitable Work

Built to Produce More. Built to Do More.

Professional RF engraving, intelligent production features and the laser configuration your business needs.

Core Advantages

RF Detail at Real Production Speed

Up to 2,000 mm/s with 4G acceleration — maintaining sharp engraving detail while completing more jobs per day.

Smarter Air. Cleaner Results.

Smart Dual Air Assist automatically uses low airflow for fine engraving and high airflow for faster, cleaner cutting.

Higher-Value RF Engraving

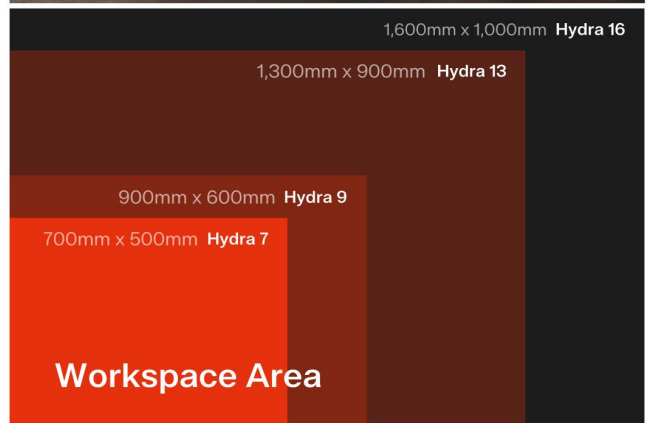

A tighter RF beam delivers finer textures, smoother grayscale and photo-quality detail for premium personalized products.

Less Maintenance. More Uptime.

Air-cooled RF technology, long tube life, real-time lens protection and stable no-calibration mechanics help reduce downtime and operating costs.

Visual Positioning Made Easier

Vision-assisted positioning improves placement accuracy and makes custom and repeat jobs easier to produce.

More Materials. More Opportunities.

Process wood, acrylic, leather, glass and coated products. An optional 50W/100W Q-switched fiber module on supported 70W Pro configurations expands production into metal marking.

Hydra Pro Gen2 70W RF

Maximum RF Performance for Premium Engraving

Ideal for high speed, fine grayscale, photo-quality textures and professional batch production.

Hydra 7 Pro - 70W RF

Hydra 9 Pro - 70W RF

Hydra 13 Pro - 70W RF

Hydra 16 Pro - 70W RF

Finer Detail · Stronger RF Output · Faster Engraving · Premium Production

Hydra Hybrid Gen2 38W RF + DC CO₂

Fine RF Engraving and Powerful Cutting in One Machine

Ideal for detailed engraving, strong sheet cutting and mixed engraving and-cutting jobs.

Hydra 9 Hybrid - 38W RF + 100W DC

Hydra 13 Hybrid - 38W RF + 130W DC

Hydra 16 Hybrid - 38W RF + 150W DC

RF Engraving Detail · Powerful Cutting · Mixed-Job Production · Broader Product Range

**Choose 70W RF for maximum engraving performance,
or 38W RF + DC CO₂ for precision engraving and powerful cutting.**

***GALVO FLEX* Series**

First Choice in Galvo. Anywhere You Go.

Portable, affordable, easy to master and built to last — the galvo laser built for makers who want professional marking at home or on the go.

Find Your Galvo Flex

Start with the material and finish — not just the wattage.

Any Material, One Platform

Multiple laser sources option on a single flexible galvo purpose.

Fold. Carry. Create Anywhere.

Compact, foldable design goes wherever your business does.

Full 360° Engraving

Galvo precision covers every angle, no blind spots.

Touchscreen Controller

Full control at your fingertips — run jobs anywhere.

Lightning-Fast Marking

Marking speeds up to 12,000 mm/s.

250 × 250 mm Work Area

Ample marking field for a wide range of products.

Expandable UV Model

6W UV configuration upgradable with a 100W MOPA source.

The World's Best Laser Technology, Shared With Every Maker.

Designed, Supported & Trusted in the **USA**. 

Trusted by **10,000+** Makers Across World.

U.S. Machine Company

A machine partner built for the U.S. market, with accountable delivery, local support, available spare parts, a growing user community, and service you can rely on.

Innovation-Driven Performance

We turn innovation into real productivity: faster workflows, steadier output, and less manual work.

Outcome Guarantee

We stand behind the results you need, from setup and first successful jobs to reliable, measurable production over time.
