X SERIES

Performance Desktop Laser Engraver

The New King of Desktop Lasers THIS DESKTOP IS NOT A TOY.

The X Series turns your home or small studio into a real production shop.

Featuring a desktop footprint that fits on any workbench,
it delivers industrial-grade 3G acceleration and up to 1,200 mm/s processing speed.

Run batches, hit deadlines, and grow your business — right from home.

Make Better With One.

X Series Can Do Far More Than You Dare To Dream...

From learning the basics to mastering your craft, the X Series handles a massive variety of materials to deliver commercial-grade products

Laser Engraving

- Photo Engraving
- Rubber Stamp
- Glass Etching
- EVA Flip Flop
- Clothes Etching
- Tumblers
- Keyboard Caps
- Coasters
- Stone Engraving
- Engrave Mirror
- Wine Bottle Etching

Laser Cutting

- Wood Cutting
- Photo Frames
- Paper Artwork
- Festival Decoration
- Film Cutting
- Architectural Models
- Signage
- Name Plate
- 3D Models
- Wood Puzzles
- Wedding Gifts
- Toys & Games

Laser Marking

- Custom Jewelry
- Leather Wallet
- Card Holder
- Flasks
- Ceramic Mug
- Souvenir Coins
- Medical Part Marking

10 Key Innovations

01 Choose Your Power

XRF Power Option: High Speed, 3D Photorealistic Engraving, 38w RF Power Source.

XT Power Option: Efficient Crafting with 55w DC Glass Tube.

02 3D Photorealistic

0.01mm Unmatched Accuracy of 3D Photorealistic with Longlasting Max 30,000 hour RF Metal Tube.

03 XFocus™

Our Integrated Sensing Technology Achieved Industry-Level Autofocus with Motorized Laserhead, Simplifying Your Work Flow.

04 Base Boost™

Take Your Engraving to New Heights, Base Boost™ Add-on is Perfect for 40oz Tumblers or Larger Projects, Dust-free Workspace, Safety, and Cleaner Air All In One.

05 Align What?!

Our Machine Delivers Accuracy with Zero Need for Beam Alignment for Setup. Thanks to Our Industry-Leading Engineering of Frame Structure Offering Stability and Performance.

06 "One" Touch of Innovation

Intuitive OneLaser Touch-Screen For Precise Operation Movement, Real-Time Adjustment, and Instant Status Updates.

07 FumeGuard™

Industrial First FumeWatch System Engineered to Control Harmful Fumes, Protecting Your Home, Children and Pets.

08 Conveyor Feeder

Add-on Automatic Feeding Grants Your Desktop Machine The Power to Tackle Large-Scale Engravings With Ease. Embrace the Unlimited Potential of Your Creations.

"One" Touch of Innovation

09 Magnetic QuickSwitch™

Effortlessly Swap Magnetic Focus Lenses with No Tools Needed, Fast, Easy, and Accessible For Everyone.

10 The Fastest of Its Kind, Worldwide

The X Desktop Series Delivers The Fastest Engraving Speeds Of Its Class Worldwide - Featuring True 3G Acceleration (29,430mm/s²), with "XT" Reaching 800mm/s and "XRF" Hitting 1,200mm/s on XRF, Powered by Optimized DSP Motion Control for Reduced Work Time and Cost, Far Surpassing G-Code Powered Diode & CO₂ Toys that You'll Likely Have To Upgrade Eventually.

Choose Your Engine.

RF Precision vs. Glass Power.

The XRF: 38W RF Metal Tube (The Ultimate Production Engine)

Engineered for professional applications that demand extreme precision, consistent quality, and long-term reliability.

Unmatched Lifespan & ROI

Constructed with a robust sealed metal enclosure, the RF tube boasts a lifespan of up to 30,000 hours—up to 10 times longer than standard DC glass tubes. Built for long-term savings, costing under \$2 a day over a 6-year lifespan.

Maintenance-Free & Air-Cooled

Forget clunky water chillers. The XRF is completely air-cooled and highly resistant to environmental changes. Zero water leakage, zero freezing risks, zero maintenance.

Stunning 3D Photorealistic Engraving

Advanced high-frequency pulsing (20 MHz - 100 MHz) ensures rapid power modulation. It produces a microscopic 0.07mm dot size for breathtaking 2,000 DPI resolution, perfect for 3D photorealistic engraving and intricate details.

Deceptive Cutting Power

Don't let the wattage fool you. The highly stable 38W RF tube provides cutting power equivalent to a 60W glass tube.

The XT: 55W CO₂ Glass Tube (The Efficient Crafter)

The perfect balance of upfront affordability and efficient cutting power for startups and general crafting.

Cost-Effective Power

An economical choice that delivers raw DC-excited laser power without the high upfront cost, making it ideal for high-power simple cuts and general applications.

All-in-One Water Cooling

No messy external water buckets. The XT features a fully integrated built-in water cooling system designed for space-saving efficiency.

High-Speed Productivity

Powered by the 55W glass tube, the XT effortlessly achieves 800 mm/s engraving speeds and true 3G acceleration.

Fine Crafting Quality

Delivers highly detailed carvings at 1,000 DPI with a reliable 0.25mm dot size, making your work stand out.

Feature	ONELASER XRF (38W RF)	ONELASER XT (55W Glass)
Laser Dot Size	0.07 mm (Pinpoint Precision)	0.25 mm
Max Resolution	2,000 DPI (3D Photorealistic)	1,000 DPI
Average Lifespan	Up to 30,000 Hours	1,500 - 3,000 Hours
Cooling System	Built-in Air Cooling	Built-in Water Cooling
Power Modulation	Fast Response (20-100 MHz)	Slower Response (DC)
Best Used For	High-res engraving, 3D art, fine text	General crafting, simple cuts

Go Big. Breathe Easy.

Infinite Possibilities on a Desktop

● Auto Conveyor Feeder

The optional automatic feeding system grants your desktop machine the power to tackle large-scale continuous tasks with ease.

● Hassle-Free Alignment

Our industry-leading engineered frame structure offers superior stability, delivering accuracy with minimal need for beam alignment.

Studio & Home Friendly

● Performance That Whispers

The industry's first intelligent noise reduction design delivers performance under **65 decibels** without compromise.

● When Things Heat Up, We Cool Down

The system instantly alerts you when temperatures rise, stopping the laser before any damage occurs.

● Sealed for Safety (FDA Class 1)

The machine won't operate unless the lid is securely closed. Fully enclosed working area shields against dust and maximizes stability.

Makerboost

Built by OneLaser. Optimized for X Series.

Makerboost goes beyond mere compatibility — it's fully integrated into the X Series platform, with functions designed exclusively for high-efficiency engraving, batch coding, and intelligent alignment. It provides operators with robust tools through a streamlined interface and automates tasks that previously demanded additional steps.

Key Advantages of Makerboost on X Series:

- Auto Device Detection: Automatically identifies the Series model and laser power, and applies the correct parameters instantly.
- Mark Point Recognition: Automatically detects registration marks to ensure accurate alignment for engraving applications.
- Smart Variable Data Support: Effortlessly generate barcodes, QR codes, serial numbers, and dynamic text from CSVs or templates for efficient batch engraving.
- Advanced Output Optimization: Fine-tune images, add lead-in/out lines, and apply kerf offset to achieve precise fits and professional engraving results.

Makerboost + X Series = Quick setup, fewer mistakes, seamless workflow — ready to go instantly.

LightBurn

Compatible with LightBurn and supported formats: AI, PDF, SC, DXF, HPGL, PLT, RD, SCPRO2, SVG, LBRN, BMP, JPG, JPEG, PNG, GIF, TIF, TIFF, and TGA

US Machine Company

Our Local Commitment

Certified Safety (FDA Class 1)

Utilizing a fully enclosed housing and a safety lid detection system, it fundamentally eliminates the risk of retinal damage—outperforming dangerous open-frame UV or Diode lasers. It ensures operator protection and gives you the most comprehensive protection.

Built to Last (Industrial-Grade Durability)

Engineered with scientifically rigorous electrical and mechanical designs, the machine undergoes long-term fatigue and abuse testing to ensure it is an industrial powerhouse and not a toy.

Local Support, Global Reach

Backed by a strong local U.S. technical support team, our service team provides quick assistance and rapid-response after-sales service. This ensures smooth operations and maximum uptime for your production line.
